Dayton Regional Pathways HUB

COORDINATING CARE FOR PATIENTS IN NEED

The Dayton Regional Pathways HUB is a regional clinical-community linkages care coordination system that addresses the medical and social determinants of health.

The Pathways HUB strives to help low-income women have healthy pregnancies and healthy babies. The Pathways HUB connects pregnant women to needed medical and social services - including food, housing, transportation, cribs and diapers.

The Pathways HUB system includes multiple care coordination agencies that employ community health workers and other care coordinators, who work with residents to identify their greatest risks and manage them one by one.

PATIENT REFERRALS

The Dayton Regional Pathways HUB is seeking referrals for patients who are pregnant and are Medicaid eligible.

While the program will expand to serve other members of the family and community, our focus at this time is on pregnant women and those who have recently given birth.

To make a referral to the Dayton Regional Pathways HUB, or if you have any questions, please call the Greater Dayton Area Hospital Association at [937-424-2362](tel:937-424-2362) or email DaytonHUB@gdaha.org

HOW PATHWAYS WORKS

The Dayton Regional Pathways HUB uses the Pathways Community HUB model which is recognized by the Agency for Healthcare Research and Quality as a data-driven approach to identifying and addressing risk factors at the individual and community levels.

Upon enrollment, every client meets with a community health worker (CHW), who completes a comprehensive risk assessment. Each risk is translated into a "pathway," including unmet needs for food, housing and other social services. Risks are addressed one at a time, with clients helping to determine priorities.

Pathways are tracked through completion in the electronic health information database, and this comprehensive approach and heightened level of accountability leads to improved outcomes and reduced cost, according to the Agency for Healthcare Research and Quality.

Made possible with funding from the Ohio Commission on Minority Health.
